JURAS

PERENNIAL RYEGRASS

PERFECT FOR GRAZING!

JURAS

Features:

- Perennial ryegrass
- Tetraploid

Heading date:

- 25/05

Heading date observed in trials performed in West Central France.

Profile:

- Long term

Persistence:

- 4 years and more

Soil types:

- Healthy and deep

Sowing rate:

- 25 to 30 kg/ha (10 to 12 kg/ac) as pure
- or in combination with 2 to 3 kg/ha (0.8 to 1.2 kg/ac) white clover

ITS ADVANTAGES

- **A quality and well-consumed fodder:**

- JURA produces a healthy forage thanks to its excellent resistance to blights.
- It's characterized by some leafy and palatable regrowth because of its slow aftermath heading.

- **A regular production:**

- With an important spring production and a strong regrowth dynamic in summer/fall, JURAS guarantees the fodder's production.

FOR WHAT USE ?

Grazing	Mowing
	

Seeding (August-September or March-April):

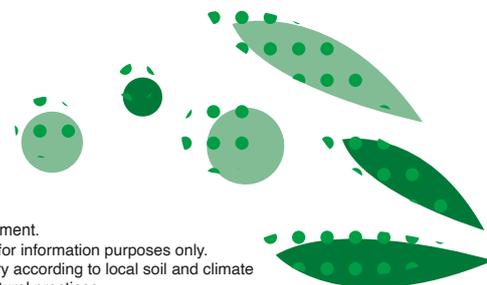

- Prepare a thin surface soil;
- Seed at a depth of 1 up to 2 cm;
- Roll right after seeding.

Protection:

- Monitor slugs during the implantation and take action if needed;
- Remove the weeds (as early as 3-4 leaves stage) if needed (seek advice from your technician).

Packaging:
Bag of 15 kg
