BELVINE®

Plant defence stimulator

**Stimulate for faster
and stronger defense**

**PROFESSIONAL PRODUCTS: USE PHYTOPHARMACEUTICALS WITH CAUTION.
BEFORE ANY USE, READ THE LABEL AND PRODUCT INFORMATION**

BELVINE®

Composition:

- 325,6 g/L of ABE-IT 56

Source:

extract of *Saccharomyces cerevisiae*

Dose :

- 3L/ha

Type :

Plant health stimulator

BENEFITS

- For use in organic farming in accordance with eu regulation 2018/848 & 2021/1165
- **Principal innovative asset**
 - It is composed of amino acids, glycerol, glucan and mannan, among others, and it stimulates a number of defence mechanisms.
- **Liquid composition**
 - This formulation offers a good emulsification and stability in the tank.
Provides good coverage of the foliage and bunches for better signal perception by the plant.
- **Method:**
 - After the first application, the defence system is ready to limit the development of the disease (mildew)..
There is a systemic and persistent signal .
- **REDUCTION IN FTA**
 - Reducing the quantity of conventional fungicides in protection programmes.

Belvine should be applied preventively, before the first contaminations appear.

It can be used against mildew in pre-flowering or late flowering.

In organic farming, it can be used with modulated doses of copper throughout the cycle.
