TONUSS

FORAGE - RYEGRASS

TOP YIELDS!

TONUSS is a hybrid ryegrass
easy to dry, to harvest and yielding a lot.

TONUSS

Features:

- Hybrid ryegrass
- Diploid **Heading**

date:

- 12/05

Heading date recorded in official trials performed in West Central France

Profile:

- Medium persistency

Persistency:

- 2 to 3 years

Soil types:

- Well drained

Sowing rate:

- 20 to 25 kg/ha (8 to 10 kg/ac) straight
- 12 to 15 kg/ha (4-6 kg/ac), or in combination with red clover 10 to 12 kg/ha (4 to 5 kg/ac).

ITS ADVANTAGES

• Highly resistant:

- TONUSS is most resistant to common ryegrass diseases (rust: 5.6, hmelinthosporiosis: 5.9) ;
- It provides healthy foliage and excellent feed value.

• Easy to cultivate:

- TONUSS starts growing very early ;
- Early start in spring, late heading date.
- Excellent dry matter content for a good feed intalce.

Record production:

- TONUSS provides an impressive and evenly distributed forage production.

“ Regardless of the production period, it clearly outperforms other references (114% vs. reference during registration).”

FOR WHAT USE ?

Grazing	Mowing
	

Sowing (August-September or March-April):

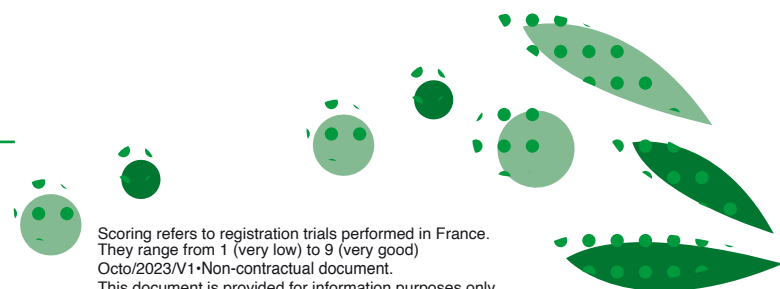

- Prepare a thin seed bed;
- Sow at a depth of 1 up to 2 cm;
- Roll right after sowing.

Protection:

- Monitor slugs during the establishment and take action if needed;
- Remove the weeds at 3-4 leaves stage if needed (seek advice from your technician)..

Packaging:
15 kg bag

Scoring refers to registration trials performed in France. They range from 1 (very low) to 9 (very good) Octo/2023/V1-Non-contractual document. This document is provided for information purposes only. Recommendations may vary according to local soil and climate conditions and local agricultural practices.
