L'AGRONOME SEMENCIER

# STOCKY

## ITALIAN RYEGRASS

**A LEAFY VARIETY !**

# STOCKY

**Features:**

- Italian ryegrass
- Diploid

**Heading date:**

- 08/05

Heading date recorded in official trials performed in West Central France

**Profile:**

- Non persistent

**Persistency:**

- 18 to 24 months

**Soil types:**

- All types

**Sowing rate:**

- 20 to 25 kg/ha (8 to 10 kg/ac) straight
- 12 to 15 kg/ha (4-6 kg/ac) in combination with crimson clover or vetch

**STOCKY is an Italian ryegrass variety that provides abundant and consistent forage production.**

- **Improved productivity on first-cut :**
  - STOCKY produces dense forage with a high leaf-to-stem ratio.
  - Its productivity in the first cut is excellent and consistent whatever the climatic conditions are.
- **Productive regrowth with high leaf content:**
  - The breeding of STOCKY was oriented toward its ability to generate productive, vigorous and leaf-rich regrowth.
  - The energy and protein content of the plant is concentrated in the leaves.
  - Thus, STOCKY provides a high quality second cut.
- **Very good feed quality:**
  - The leaf-rich composition of STOCKY provides very palatable and digestible forage.
  - The foliage of STOCKY is very healthy due to autumn and spring diseases resistance, such as rust and helminthosporiosis.

## BENEFITS

## FOR WHAT USE ?

Grazing	Mowing
Possible	

**Sowing, August-September or March-April:**

- Prepare a thin seed bed;
- Sow at a depth of 1 up to 2 cm;
- Roll right after sowing.

**Protection:**

- Monitor slugs during the establishment and take action if needed;
- Remove the weeds as early as 3-4 leaves stage if needed (seek advice from your technician).

**Packaging:**  
15 kg bag or 300 kg big bag
