

ROMIE

TALL FESCUE

**BRINGING TOGETHER YIELDING POTENTIAL,
SOFT LEAVES AND FEEDING VALUE !**

ROMIE

Features:

- Tall fescue
- Very soft leaves (6.8)

Official trials performed in France, the scores range from 1 (very hard) to 9 (very soft).

Heading date:

- 07/05

Heading date recorded in trials performed in West Central France.

Profile:

- Long persistency

Persistency:

- 4 years and more

Soil types:

- All types of soil

Sowing rate:

- 25-30 kg/ha (10-12 kg/ac)

ITS ADVANTAGES

• Very productive in all situations:

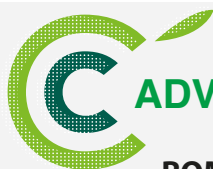

- ROMIE provides a remarkable production consistency between spring, summer and autumn.
- Although it is a late heading variety, ROMIE ensures an early production in spring.

• Variety offering a very flexible crop management:

- Bred for its soluble sugar content and its leaves softness, ROMIE is highly palatable and can be used either for grazing or mowing.
- Late heading, ROMIE offers a very flexible crop management without compromising on fodder quality.

• Improved feed quality:

- Thanks to its excellent resistance profile against diseases, ROMIE ensures the production of a healthy and very palatable forage all year long.
- In addition to leaves softness and high soluble sugar content, ROMIE has been bred on its excellent digestibility.

ADVISES YOU

ROMIE is also available with

S.A.S START biostimulant that enhances crop establishment (establishment speed) and also improves yield and recovery (thanks to increased stress resistance).

S.A.S START reduces water losses in plants during water stress periods and enhances root mass.

S.A.S START: seeds with biostimulant.
NURSEED HC - MA n°1211087 - No classification -
Ownership: FYTEKO - 4 allée de la recherche - 1070 BRUXELLES BELGIUM.

S.A.S START coating does not modify the weight of the seeds."

FOR WHAT USE ?

Grazing	Mowing

Seeding (August-September or March-April):

- Roll before sowing;
- Sow on a finely crumbled soil on the surface and at a depth of 1 to 2 cm;
- Roll right after sowing.

Protection:

- Monitor slugs during the establishment and take action if needed;
- Remove the weeds during the establishment at 3-4 leaves stage if needed (seek advice from your technician).

Packaging:
Bag of 15 kg
