ABERACE

WHITE CLOVER

A white clover with very small leaves, ideal for continuous grazing or for vineyard sodding.

ABERACE

Product features:

- White clover
- Small leaf variety, very small leaves

Profile:

- Long-term

Persistence:

- 4 years or more

Soil types:

- All types

Dosing rate (kg/ha):

- 3 to 4 kg/ha when used in combination with grasses or also in mixture.

ITS ADVANTAGES

- Highly resistant to trampling and grazing;
- Excellent soil smothering effect (a very high number of vegetative shoots);
- Good cold tolerance;
- Long-lasting persistency.

HappyGRASS
Votre assistant prairie

HappyGrass is a suite of apps designed to help you manage your meadows and grazing land. It includes a range of tools, including:

- design your meadows, mixed-crop and catch-crop fields according to your objectives and the soil and climate characteristics of your plot;
- determine your Nitrogen fertilization requirements;
- check the weather windows to plan your harvesting operations;
- record and analyse your grazing management data

IN WHAT SITUATIONS?

Grazing	Mowing
	

Sowing :

- Sow from March to April or from July to September;
- Prepare the soil so that it is firmly compacted deep down and loose on the surface to ensure good soil-to-seed contact;
- Sow at a depth of 1 cm;
- Roll the soil immediately after sowing.

Sowing protection:

- Monitor for slugs at the planting stage and take action if necessary.
- Weed if necessary from the 3-4 true-leaf stage onwards.

Packing:
2 kg bucket
