

**Cérissance**  
L'AGRONOME SEMENCIER

**DESTINY**  
COCKSFOOT

**PERFORMANCE ALL YEAR ROUND!**

# DESTINY

## Species :

- Cocksfoot
- Start of ear emergence:
  - 04/05 (1/2 late)

## Profile: Long-term

**Persistence:** 4 years or more

## Soil types:

- Well-drained and deep
- Acidic dry soils
- Calcareous dry soils

## Sowing rate (kg/ha):

- 20–25 kg/ha straight or in combination with 2–3 kg/ha of white clover

## ITS STRENGTHS

- **A variety that is productive throughout the season:**
  - DESTINY stands out for its abundant and vigorous growth from the end of winter onwards, with an excellent first cut (127 per cent of the control group at the time of registration).
  - Its yield potential remains consistent throughout the season, with excellent performance in summer and autumn.
- **High-quality fodder:**
  - DESTINY has an enhanced sugar content, which makes it more palatable and encourages the animals to eat it.
  - Its well-balanced relationship between yield and quality makes it a variety particularly well-suited to high-performance farming systems.
- **A hardy and reliable variety:**
  - DESTINY shows very good disease resistance to leaf diseases, particularly sclerotinia and various other diseases.
  - It also performs well in cold conditions, ensuring excellent persistency in a wide range of soil and climate conditions.

**HappyGRASS**  
Votre assistant prairie

HappyGrass est le bouquet d'application dédié à la gestion de vos prairies et du pâturage. Il contient de nombreux outils notamment pour :

- composer vos prairies, méteils et dérobées e fonction de vos objectifs et des caractéristiques pédoclimatiques de votre parcelle ;
- définir les besoins en fertilisation azotée ;
- visualiser les fenêtres météo pour organiser vos chantiers de récolte ;
- saisir et valoriser vos données liées à la gestion d pâturage.

## IN WHICH SITUATIONS ?

Grazing	Mowing
	

### Sowing: August–September or March–April

- Prepare the soil so that the surface is fine;
- Sow to a depth of 1 to 2 cm at most;
- Roll the soil immediately after sowing.

### Protection of sowing

- Monitor for slugs at the planting stage and take action if necessary;
- Weed at the planting stage from Stage 3–4 leaves onwards if necessary (ask your technician for advice).

Packing :  
10 kg bag
